### **V-COMM shares Expertise at National Technology Conference**

Blue Bell, PA (March 10, 2003) – V-COMM Vice President , Donald Coover, and Engineering Manager, Judy Glynn, each gave presentations in New Orleans at a User Group conference hosted by Telecommunications Service Inc. (TSI) on February 19-21. TSI is a global communications technology company specializing in roaming, fraud, intelligent network services, carrier access billing, international roaming and wireless Internet service for voice and data systems throughout the world. The User Group conference is a regular forum for telecommunications carriers and vendors to share information about new and existing technologies issues affecting the industry.

As industry experts, Coover and Glynn were requested to speak at the conference comprised of wireless industry carrier professionals. Coover's presentation focused on network and technology interoperability between North American and International standards, the issue facing carriers as a result of market consolidation, and technology harmonization.

Glynn's presentation outlines domestic and international interoperability issues for both E911 and CALEA, including a summary of each program's current status, outstanding concerns and future implications.

Both presentations are available to view on V-COMM's enhanced Website – [www.vcomm-eng.com](http://www.vcomm-eng.com). For questions or further information on either topic please contact Donald Coover or Judy Glynn at 610-684-1000.
