**CHERRY HILL TOWNSHIP HIRES V-COMM
To Increase Township's Revenues**

Cranbury, NJ - V-COMM, a leading New Jersey based telecommunications engineering firm, has entered into agreements with the Township of Cherry Hill, New Jersey, to provide critical expertise in establishing a plan to lease space on its existing radio towers to wireless phone carriers in order to generate revenue for the township.

"Our job is to meet Cherry Hill's goals, while creating a win-win situation for the Township and the residents, says Dominic Vilecco, V-COMM's President and Founder. "We are confident that we are up to the challenge."

V-COMM was retained by Cherry Hill to develop a plan and prepare the township's radio towers for use by wireless carriers. The primary goal is to attract wireless carriers to install antennas at this site, which will provide a new source of income for the local government and help ease the tax burden. The secondary goal is to achieve maximum wireless coverage in the area, improving access to emergency services, without the need of a large tower.

V-COMM is a leading provider of integrated network engineering, radio frequency engineering, and business services. V-COMM delivers the needed expertise and cost-effective solutions to governmental agencies, and wired and wireless operators. Company executives are much sought-after expert witnesses providing testimony on telecommunications issues in local, regional, national, and international venues. V-COMM has a growing staff of nearly 30 engineers and professionals with offices in Cranbury, NJ and Blue Bell, PA. For more information, visit us on the World Wide Web at www.vcomm-eng.com.
